

Installation Instructions

Custom Free Standing Greenville Arbor Kit

608 Queen Street
P.O. Box 1137
Grifton, NC 28530

Note: Rails & top slats are shipped in full length size. Cut to fit your application using a fine tooth, carbide tipped blade power saw.

1. Remove all items from package
2. Lay out 2x8 beams, cut to size & screw together (see detail A)
**Refer to Detail C if beams are longer than 16'
3. Slide skirts on posts and mount posts in proper location (see Post Note)
**New Construction: Recommend inserting 6" x 6" treated wood post in 6.5" x 6.5" vinyl sleeve & concrete in place.
4. Attach 2x6 rails to top of post (see detail A)
5. Cut top slats to proper size and attach to top of rails with angle clips & screws (see Detail B)
6. Glue on end caps (flat end cap is for the middle rail)
7. Enjoy your new Custom Arbor from Carolina Vinyl Products
